Skin autofluorescence is associated with arterial stiffness and insulin level in endurance runners and healthy controls - Effects of aging and endurance exercise

Christian Couppé, Christian Have Dall, Rene Brüggbusch Svensson, Rasmus Huan Olsen, Anders Karlsen, Stephan Praet, Eva Prescott, S. Peter Magnusson

PII: S0531-5565(16)30403-X
DOI: doi: [10.1016/j.exger.2017.02.002](https://doi.org/10.1016/j.exger.2017.02.002)
Reference: EXG 9996

To appear in: *Experimental Gerontology*

Received date: 4 October 2016
Revised date: 6 January 2017
Accepted date: 6 February 2017

Please cite this article as: Christian Couppé, Christian Have Dall, Rene Brüggbusch Svensson, Rasmus Huan Olsen, Anders Karlsen, Stephan Praet, Eva Prescott, S. Peter Magnusson , Skin autofluorescence is associated with arterial stiffness and insulin level in endurance runners and healthy controls - Effects of aging and endurance exercise. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Skin autofluorescence is associated with arterial stiffness and insulin level
in endurance runners and healthy controls
Effects of aging and endurance exercise**

Authors:

Christian Couppé^{1,2}, Christian Have Dall^{1,2,3}, Rene Brüggelbusch Svensson², Rasmus Huan Olsen³, Anders Karlsen², Stephan Praet⁴, Eva Prescott³, S. Peter Magnusson^{1,2}
