

Accepted Manuscript

Myosin content of single muscle fibers following short-term disuse and active recovery in young and old healthy men

Lars G. Hvid, Lorenza Brocca, Niels Ørtenblad, Charlotte Suetta, Per Aagaard, Michael Kjaer, Roberto Bottinelli, Maria Antonietta Pellegrino

PII: S0531-5565(16)30240-6
DOI: doi: [10.1016/j.exger.2016.10.009](https://doi.org/10.1016/j.exger.2016.10.009)
Reference: EXG 9928

To appear in: *Experimental Gerontology*

Received date: 4 August 2016
Revised date: 5 October 2016
Accepted date: 24 October 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Myosin content of single muscle fibers following short-term disuse and active recovery in young and old healthy men

Lars G. Hvid¹, Lorenza Brocca², Niels Ørtenblad^{1,3}, Charlotte Suetta⁴, Per Aagaard¹, Michael Kjaer⁵, Roberto Bottinelli², Maria Antonietta Pellegrino²
