

## Accepted Manuscript

Cognitive behavior and sensory function were significantly influenced by restoration of active ovarian function in postreproductive mice

Kate C. Parkinson, Rhett L. Peterson, Jeffrey B. Mason

PII: S0531-5565(16)30298-4

DOI: doi: [10.1016/j.exger.2017.03.002](https://doi.org/10.1016/j.exger.2017.03.002)

Reference: EXG 10014

To appear in: *Experimental Gerontology*

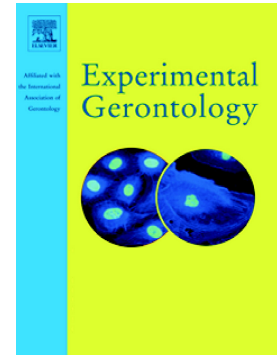

Received date: 30 August 2016

Revised date: 13 February 2017

Accepted date: 1 March 2017

Please cite this article as: Kate C. Parkinson, Rhett L. Peterson, Jeffrey B. Mason , Cognitive behavior and sensory function were significantly influenced by restoration of active ovarian function in postreproductive mice. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. *Exg*(2017), doi: [10.1016/j.exger.2017.03.002](https://doi.org/10.1016/j.exger.2017.03.002)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# **Cognitive Behavior and Sensory Function Were Significantly Influenced by Restoration of Active Ovarian Function in Postreproductive Mice**
