Uric acid levels correlate with the severity of diabetic sensorimotor polyneuropathy

Alon Abraham, Ari Breiner, Carolina Barnett, Hans D. Katzberg, Leif E. Lovblom, Bruce A. Perkins, Vera Bril

PII: S0022-510X(17)30357-X
DOI: doi: [10.1016/j.jns.2017.05.053](https://doi.org/10.1016/j.jns.2017.05.053)
Reference: JNS 15360

To appear in: *Journal of the Neurological Sciences*

Received date: 7 February 2017
Revised date: 23 May 2017
Accepted date: 24 May 2017

Abstract Word count: 163

Word Count of Manuscript: 2035

Tables: 4 Figures: 2

Running title: Uric acid correlates with diabetic polyneuropathy severity

Funding: JDRF (operating grant 17-2008-715) and the Canadian Diabetes Association (operating grant OG-3-10-3123- BP).

The authors have no conflicts of interest to report.

Key words: Uric acid, diabetes mellitus, polyneuropathy, nerve conduction studies, creatine kinase, gait abnormality
