This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Vitamin A Metabolism in IHH

Role of Vitamin A Metabolism in IHH: Results from the Idiopathic Intracranial Hypertension Treatment Trial

J Libien¹, MJ Kupersmith², W Blaner³, MP McDermott⁴, S Gao⁴, Y Liu¹, J Corbett⁵, M Wall⁶,
for the NORDIC Idiopathic Intracranial Hypertension Study Group

1. Pathology, State University of New York, Downstate School of Medicine, Brooklyn, New York
2. Neurology and Ophthalmology, Mount Sinai West and Icahn School of Medicine at Mount Sinai, New York, New York
3. Medicine, College of Physicians and Surgeons, Columbia University School of Medicine, New York, New York
4. Biostatistics, University of Rochester, Rochester, New York
5. Neurology, University of Mississippi School of Medicine, Jackson, Mississippi
6. Neurology, University of Iowa School of Medicine, Iowa City, Iowa

Key words: vitamin A, retinoids, idiopathic intracranial hypertension, obesity

Running title: Vitamin A Metabolism in IHH

Supported by U10 EY017281-01A1, U10 EY017387-01A1, 3U10EY017281-01A1S1

Trial registration: clinicaltrials.gov identifier: NCT01003639
