This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- The association between climacteric symptoms and pelvic organ prolapse was investigated in a single-center cross-sectional study of 1382 postmenopausal women.
 - The Greene Climacteric Scale was used to investigate symptoms.
 - A higher score on the Greene Climacteric Scale was associated with a higher prevalence of pelvic organ prolapse.
-

ASSOCIATION BETWEEN PELVIC ORGAN PROLAPSE AND CLIMACTERIC SYMPTOMS IN POSTMENOPAUSAL WOMEN

RUNNING TITLE: POP AND CLIMACTERIC SYMPTOMS
