Title: Adrenergic signaling in heart failure and cardiovascular aging

Author: Gaetano Santulli Guido Iaccarino

PII: S0378-5122(16)30071-8

DOI: <http://dx.doi.org/doi:10.1016/j.maturitas.2016.03.022>

Reference: MAT 6587

To appear in: *Maturitas*

Received date: 4-3-2016

Revised date: 23-3-2016

Accepted date: 25-3-2016

Please cite this article as: Santulli Gaetano, Iaccarino Guido. Adrenergic signaling in heart failure and cardiovascular aging. *Maturitas* <http://dx.doi.org/10.1016/j.maturitas.2016.03.022>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Adrenergic receptors are functionally involved in numerous processes underlying both aging and cardiovascular disease, in particular heart failure;
 - Aging causes a series of rearrangements in the sympathetic nervous system;
 - This article reviews the pathophysiological role of the sympathetic nervous system in cardiovascular aging.
-

INVITED REVIEW**Adrenergic signaling in heart failure and
cardiovascular aging****Gaetano Santulli¹, Guido Iaccarino²**
