This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Functional Disconnection of Thalamic and Cerebellar Dentate Nucleus

Networks in Progressive Supranuclear Palsy and Corticobasal Syndrome

Neeraj Upadhyay PhD¹, Antonio Suppa MD PhD¹⁻², Maria Cristina Piattella MD PhD¹, Costanza Gianni MD¹, Matteo Bologna MD PhD¹⁻², Flavio Di Stasio MD², Nikolaos Petsas PhD¹, Francesca Tona MD¹, Giovanni Fabbrini MD¹⁻², Alfredo Berardelli MD¹⁻² and Patrizia Pantano MD¹⁻²

¹Department of Neurology and Psychiatry, “Sapienza” University of Rome, Italy, ²IRCCS

Neuromed Institute, Pozzilli (IS), Italy.

Keywords: progressive supranuclear palsy, corticobasal syndrome, functional connectivity, thalamus, dentate nucleus.

Running head: Thalamic and dentate nucleus functional connectivity in PSP and CBS.

Number of words (Abstract): 202

Number of words (Introduction): 620

Number of words (Discussion): 1001

Number of words (excluding references and abstract): 3197

Number of Figures: 2

Number of Tables: 2
