Molecular hydrogen modulates gene expression via histone modification and induces the mitochondrial unfolded protein response

Sayaka Sobue, Chisato Inoue, Fumiko Hori, Shanlou Qiao, Takashi Murate, Masatoshi Ichihara

PII: S0006-291X(17)31784-9

DOI: [10.1016/j.bbrc.2017.09.024](https://doi.org/10.1016/j.bbrc.2017.09.024)

Reference: YBBRC 38469

To appear in: *Biochemical and Biophysical Research Communications*

Received Date: 29 August 2017

Accepted Date: 6 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Molecular hydrogen modulates gene expression via histone modification and induces the mitochondrial unfolded protein response
