Transcriptional profiles of type 2 diabetes in human skeletal muscle reveal insulin resistance, metabolic defects, apoptosis, and molecular signatures of immune activation in response to infections

Chun Wu, Gang Xu, Shang-Yi A. Tsai, William J. Freed, Chun-Ting Lee

PII: S0006-291X(16)31911-8

DOI: [10.1016/j.bbrc.2016.11.055](https://doi.org/10.1016/j.bbrc.2016.11.055)

Reference: YBBRC 36759

To appear in: *Biochemical and Biophysical Research Communications*

Received Date: 30 October 2016

Accepted Date: 11 November 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Transcriptional profiles of type 2 diabetes in human skeletal muscle reveal insulin resistance, metabolic defects, apoptosis, and molecular signatures of immune activation in response to infections
