Adipokine CTRP6 improves PPAR γ activation to alleviate angiotensin II-induced hypertension and vascular endothelial dysfunction in spontaneously hypertensive rats

Liyi Chi, Xiaojing Hu, Wentao Zhang, Tao Bai, Linjing Zhang, Hua Zeng, Ruirui Guo, Yanhai Zhang, Hongyan Tian

PII: S0006-291X(16)31976-3

DOI: [10.1016/j.bbrc.2016.11.102](https://doi.org/10.1016/j.bbrc.2016.11.102)

Reference: YBBRC 36806

To appear in: *Biochemical and Biophysical Research Communications*

Received Date: 17 November 2016

Accepted Date: 17 November 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 Adipokine CTRP6 improves PPAR γ activation to alleviate angiotensin II-induced hypertension
2 and vascular endothelial dysfunction in spontaneously hypertensive rats
