

Accepted Manuscript

High resolution mass spectrometry characterization of the oxidation pattern of methionine and cysteine residues in rat liver mitochondria voltage-dependent anion selective channel 3 (VDAC3)

Rosaria Saletti, Simona Reina, Maria G.G. Pittalà, Ramona Belfiore, Vincenzo Cunsolo, Angela Messina, Vito De Pinto, Salvatore Foti

PII: S0005-2736(16)30388-1
DOI: doi:[10.1016/j.bbamem.2016.12.003](https://doi.org/10.1016/j.bbamem.2016.12.003)
Reference: BBAMEM 82366

To appear in: *BBA - Biomembranes*

Received date: 3 August 2016
Revised date: 18 November 2016
Accepted date: 14 December 2016

Please cite this article as: Rosaria Saletti, Simona Reina, Maria G.G. This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

High resolution mass spectrometry characterization of the oxidation pattern of methionine and cysteine residues in rat liver mitochondria Voltage-Dependent Anion selective Channel 3 (VDAC3)
