This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Membrane-Lipid Therapy: a historical perspective of membrane-targeted therapies - from lipid bilayer structure to the pathophysiological regulation of cells

Pablo V. Escribá

Department of Biology, University of the Balearic Islands, E-07122 Palma de Mallorca, Spain.

Email: pablo.escriba@uib.es

Keywords: membrane-targeting therapies; peripheral membrane protein localization and activity; lipids in pathophysiology; membrane lipid composition and structure; lipids in Alzheimer's disease drug discovery; lipids in cancer drug discovery
