

## Accepted Manuscript

Phospholipid composition of packed red blood cells and that of extracellular vesicles show a high resemblance and stability during storage

Eva Laurén, Feven Tigistu-Sahle, Sami Valkonen, Melissa Westberg, Anne Valkeajärvi, Juha Eronen, Pia Siljander, Ville Pettilä, Reijo Käkelä, Saara Laitinen, Erja Kerkelä

PII: S1388-1981(17)30205-6  
DOI: doi:[10.1016/j.bbalip.2017.09.012](https://doi.org/10.1016/j.bbalip.2017.09.012)  
Reference: BBAMCB 58210

To appear in:

Received date: 15 February 2017  
Revised date: 7 September 2017  
Accepted date: 24 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Phospholipid composition of packed red blood cells and that of extracellular vesicles show a high resemblance and stability during storage
