Theobromine suppresses adipogenesis through enhancement of CCAAT-enhancer-binding protein β degradation by adenosine receptor A1

Takakazu Mitani, Shun Watanabe, Yasukiyo Yoshioka, Shigeru Katayama, Soichiro Nakamura, Hitoshi Ashida

PII: S0167-4889(17)30264-1
DOI: doi:[10.1016/j.bbamcr.2017.09.017](https://doi.org/10.1016/j.bbamcr.2017.09.017)
Reference: BBAMCR 18185

To appear in:

Received date: 24 May 2017
Revised date: 11 September 2017
Accepted date: 26 September 2017

Please check if appropriate. *Bbamcr*(2017), doi:[10.1016/j.bbamcr.2017.09.017](https://doi.org/10.1016/j.bbamcr.2017.09.017)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Theobromine suppresses adipogenesis through enhancement of
CCAAT-enhancer-binding protein β degradation by adenosine receptor A1**
