## Accepted Manuscript

Deciphering the molecular architecture of membrane contact sites by cryoelectron tomography

Javier Collado, Rubén Fernández-Busnadiego

PII:	S0167-4889(17)30063-0
DOI:	doi:10.1016/j.bbamcr.2017.03.009
Reference:	BBAMCR 18065

To appear in: BBA - Molecular Cell Research

Received date:16 January 2017Revised date:13 March 2017Accepted date:17 March 2017

Please cite this article as: Javier Collado, Rubén Fernández-Busnadiego, Deciphering the molecular architecture of membrane contact sites by cryo-electron tomography, *BBA* - *Molecular Cell Research* (2017), doi:10.1016/j.bbamcr.2017.03.009

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## ACCEPTED MANUSCRIPT

Deciphering the molecular architecture of membrane contact sites by cryo-electron

tomography
