

Accepted Manuscript

TRPC1 and TRPC4 channels functionally interact with STIM1L to promote myogenesis and maintain fast repetitive Ca^{2+} release in human myotubes

Fabrice Antigny, Jessica Sabourin, Sophie Saüc, Laurent Bernheim, Stéphane Koenig, Maud Frieden

PII: S0167-4889(17)30028-9
DOI: doi:[10.1016/j.bbamcr.2017.02.003](https://doi.org/10.1016/j.bbamcr.2017.02.003)
Reference: BBAMCR 18045

To appear in: *BBA - Molecular Cell Research*

Received date: 10 November 2016
Revised date: 25 January 2017
Accepted date: 3 February 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

TRPC1 and TRPC4 channels functionally interact with STIM1L to promote myogenesis and maintain fast repetitive Ca^{2+} release in human myotubes

Fabrice Antigny¹, Jessica Sabourin³, Sophie Saüc^{1&2}, Laurent Bernheim¹, Stéphane Koenig¹ and Maud Frieden²
