Mechanical stress affects methylation pattern of *GNAS* isoforms and osteogenic differentiation of hAT-MSCs

Angeliki-Maria Vlaikou, Dimitrios Kouroupis, Argyro Sgourou, Georgios S. Markopoulos, Eleni Bagli, Maria Markou, Zoe Papadopoulou, Theodore Fotsis, Georgios Nakos, Maria-Eleni E. Lekka, Maria Syrrou

PII: S0167-4889(17)30116-7
DOI: doi:[10.1016/j.bbamcr.2017.05.005](https://doi.org/10.1016/j.bbamcr.2017.05.005)
Reference: BBAMCR 18091

To appear in: *BBA - Molecular Cell Research*

Received date: 15 December 2016
Revised date: 30 April 2017
Accepted date: 3 May 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

“Mechanical stress affects methylation pattern of *GNAS* isoforms and osteogenic differentiation of hAT-MSCs”
