

## Accepted Manuscript

A protein kinase A-ezrin complex regulates connexin 43 gap junction communication in liver epithelial cells

Aleksandra Dukic, Linda Hofstad Haugen, Guillaume Pidoux, Edward Leite, Oddmund Bakke, Kjetil Taskén

PII: S0898-6568(17)30008-6  
DOI: doi:[10.1016/j.cellsig.2017.01.008](https://doi.org/10.1016/j.cellsig.2017.01.008)  
Reference: CLS 8823

To appear in: *Cellular Signalling*

Received date: 15 September 2016  
Revised date: 4 December 2016  
Accepted date: 4 January 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# **A Protein Kinase A-Ezrin Complex Regulates Connexin 43 Gap Junction Communication in Liver Epithelial Cells**

## **Highlights**

- Ezrin is a membrane-anchored AKAP in liver epithelial cells
- Ezrin associates with Cx43 bringing PKA in proximity to Cx43 in liver epithelial cells
- Gap junction communication is regulated by anchored PKA phosphorylation in liver epithelial cells
