

## Accepted Manuscript

Elevated expression of miR-24-3p is a potentially adverse prognostic factor in colorectal adenocarcinoma

Dimitrios Kerimis, Christos K. Kontos, Spyridon Christodoulou, Iordanis N. Papadopoulos, Andreas Scorilas

PII: S0009-9120(16)30387-3  
DOI: doi: [10.1016/j.clinbiochem.2016.11.034](https://doi.org/10.1016/j.clinbiochem.2016.11.034)  
Reference: CLB 9438  
To appear in: *Clinical Biochemistry*  
Received date: 8 October 2016  
Revised date: 25 November 2016  
Accepted date: 29 November 2016

Please cite this article as: Dimitrios Kerimis, Christos K. Kontos, Spyridon Christodoulou, Iordanis N. Papadopoulos, Andreas Scorilas , Elevated expression of miR-24-3p is a potentially adverse prognostic factor in colorectal adenocarcinoma. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. *Clb*(2016), doi: [10.1016/j.clinbiochem.2016.11.034](https://doi.org/10.1016/j.clinbiochem.2016.11.034)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Elevated expression of miR-24-3p is a potentially adverse prognostic factor  
in colorectal adenocarcinoma**
