

## Accepted Manuscript

Heart rate variability reveals that a decrease in parasympathetic ('rest-and-digest') activity dominates autonomic stress responses in a free-living seabird

Martina S. Müller, Alexei L. Vyssotski, Maki Yamamoto, Ken Yoda

PII: S1095-6433(17)30164-2  
DOI: doi:[10.1016/j.cbpa.2017.07.007](https://doi.org/10.1016/j.cbpa.2017.07.007)  
Reference: CBA 10251

To appear in: *Comparative Biochemistry and Physiology, Part A*

Received date: 2 March 2017  
Revised date: 13 June 2017  
Accepted date: 19 July 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Heart rate variability reveals that a decrease in parasympathetic ('rest-and-digest') activity dominates autonomic stress responses in a free-living seabird**
