Ecophysiological adaptations to variable salinity environments in the crab *Hemigrapsus crenulatus* from the Southeastern Pacific coast: Sodium regulation, respiration and excretion

Ángel Urzúa, Mauricio A. Urbina

PII: S1095-6433(17)30118-6
DOI: doi:[10.1016/j.cbpa.2017.05.010](https://doi.org/10.1016/j.cbpa.2017.05.010)
Reference: CBA 10231

To appear in: *Comparative Biochemistry and Physiology, Part A*

Received date: 13 February 2017
Revised date: 19 May 2017
Accepted date: 22 May 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Ecophysiological adaptations to variable salinity environments in the crab *Hemigrapsus crenulatus* from the Southeastern Pacific coast: Sodium regulation, respiration and excretion
