

## Accepted Manuscript

Feather corticosterone during non-breeding correlates with multiple measures of physiology during subsequent breeding in a migratory seabird

Graham D. Fairhurst, Louise Champoux, Keith A. Hobson, Jean-François Rail, Jonathan Verreault, Magella Guillemette, William A. Montevecchi, Pauline Brousseau, Catherine Soos

PII: S1095-6433(17)30059-4  
DOI: doi:[10.1016/j.cbpa.2017.02.024](https://doi.org/10.1016/j.cbpa.2017.02.024)  
Reference: CBA 10203

To appear in: *Comparative Biochemistry and Physiology, Part A*

Received date: 28 September 2015  
Revised date: 21 February 2017  
Accepted date: 23 February 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Feather corticosterone during non-breeding correlates with multiple measures of physiology during subsequent breeding in a migratory seabird
