Transcriptome sequencing reveals potential mechanisms of diapause preparation in bivoltine silkworm *Bombyx mori* (Lepidoptera: Bombycidae)

Yan-rong CHEN, Tao JIANG, Juan ZHU, Yu-chen XIE, Zhi-cheng TAN, Yan-hua CHEN, Shun-ming TANG, Bi-fang HAO, Sheng-peng WANG, Jin-shan HUANG, Xing-jia SHEN

PII: S1744-117X(17)30057-6
DOI: doi:[10.1016/j.cbd.2017.07.003](https://doi.org/10.1016/j.cbd.2017.07.003)
Reference: CBD 465

To appear in: *Comparative Biochemistry and Physiology - Part D: Genomics and Proteomics*

Received date: 18 February 2017
Revised date: 9 July 2017
Accepted date: 28 July 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Transcriptome sequencing reveals potential mechanisms of diapause preparation in bivoltine silkworm *Bombyx mori* (Lepidoptera: Bombycidae)
