Spider acetylcholine binding proteins: An alternative model to study the interaction between insect nAChRs and neonicotinoids

Haibo Bao, Xiangkun Meng, Zewen Liu

PII: S0965-1748(17)30158-3

DOI: [10.1016/j.ibmb.2017.09.014](https://doi.org/10.1016/j.ibmb.2017.09.014)

Reference: IB 3000

To appear in: *Insect Biochemistry and Molecular Biology*

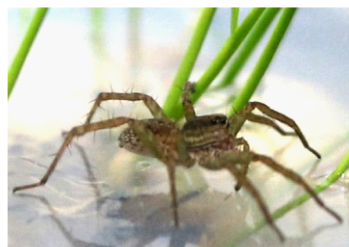

Received Date: 15 June 2017

Revised Date: 27 September 2017

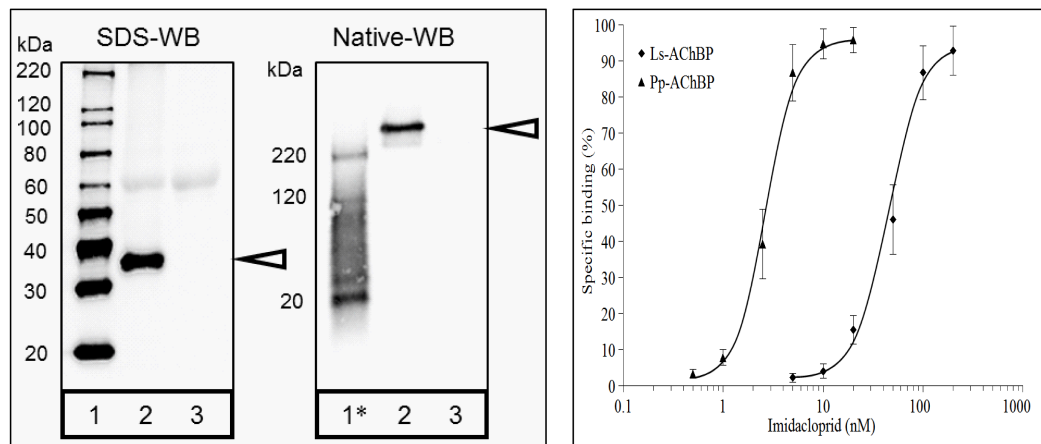

Accepted Date: 27 September 2017

Please cite this article as: Bao, H., Meng, X., Liu, Z., Spider acetylcholine binding proteins: An alternative model to study the interaction between insect nAChRs and neonicotinoids, *Insect Biochemistry and Molecular Biology* (2017), doi: 10.1016/j.ibmb.2017.09.014.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Pardosa pseudoannulata

Spider AChBP-1 shows high affinity to imidacloprid relative to mollusk AChBP
