Orcokinin neuropeptides regulate ecdysis in the hemimetabolous insect *Rhodnius prolixus*

Juan Pedro Wulff, Ivana Sierra, Marcos Sterkel, Michiel Holtof, Pieter Van Wielendaele, Flavio Francini, Jozef Vanden Broeck, Sheila Ons

PII: S0965-1748(17)30003-6

DOI: [10.1016/j.ibmb.2017.01.003](https://doi.org/10.1016/j.ibmb.2017.01.003)

Reference: IB 2915

To appear in: *Insect Biochemistry and Molecular Biology*

Received Date: 10 August 2016

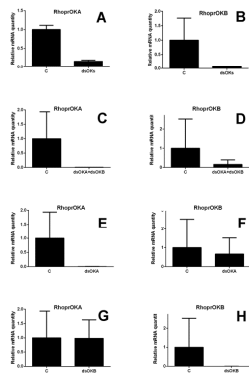

Revised Date: 14 December 2016

Accepted Date: 4 January 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

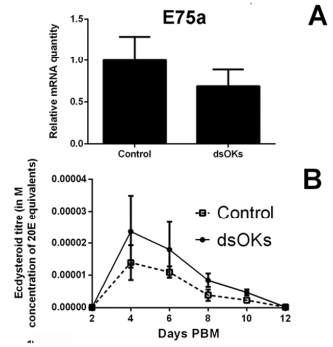

Isoform-specific silencing of RhoprOK gene

affects ecdysis

but do not affect ecdysteroidogenesis
