

## Accepted Manuscript

Title: Basil seed mucilage as a new source for electrospinning:  
Production and physicochemical characterization

Author: Forouzan Kurd Milad Fathi Hajar Shekarchizadeh

PII: S0141-8130(16)32116-X  
DOI: <http://dx.doi.org/doi:10.1016/j.ijbiomac.2016.11.116>  
Reference: BIOMAC 6809

To appear in: *International Journal of Biological Macromolecules*

Received date: 22-10-2016  
Revised date: 20-11-2016  
Accepted date: 29-11-2016

Please cite this article as: Forouzan Kurd, Milad Fathi, Hajar Shekarchizadeh, Basil seed mucilage as a new source for electrospinning: Production and physicochemical characterization, *International Journal of Biological Macromolecules* <http://dx.doi.org/10.1016/j.ijbiomac.2016.11.116>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Research highlight**

- Nanofibers were prepared by basil seed mucilage via the electrospinning technique.
- Morphology of nanofibers was investigated using scanning electron microscopy (SEM).
- Nanofibers were thermally stable.
