

Accepted Manuscript

Title: Nuclear organisation of cholinergic, catecholaminergic, serotonergic and orexinergic neurons in two relatively large-brained rodent species—The springhare (*Pedetes capensis*) and Beecroft's scaly-tailed Squirrel (*Anomalurus beecrofti*)

Authors: Jordan Sweigers, Adhil Bhagwandin, Muhammad A. Spocter, Consolate Kaswera-Kyamakya, Emmanuel Gilissen, Paul R. Manger, Busisiwe C. Maseko

PII: S0891-0618(17)30138-2
DOI: <http://dx.doi.org/10.1016/j.jchemneu.2017.09.002>
Reference: CHENEU 1519

To appear in:

Received date: 11-7-2017
Revised date: 12-9-2017
Accepted date: 12-9-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Nuclear organisation of cholinergic, catecholaminergic, serotonergic and orexinergic neurons in two relatively large-brained rodent species – the springhare (*Pedetes capensis*) and Beecroft’s scaly-tailed Squirrel (*Anomalurus beecrofti*)
