Cellular thiamine status is coupled to function of mitochondrial 2-oxoglutarate dehydrogenase

G. Mkrтчhyan, A. Graf, L. Bettendorff, V. Bunik

PII: S0197-0186(16)30140-1

DOI: [10.1016/j.neuint.2016.10.009](https://doi.org/10.1016/j.neuint.2016.10.009)

Reference: NCI 3937

To appear in: *Neurochemistry International*

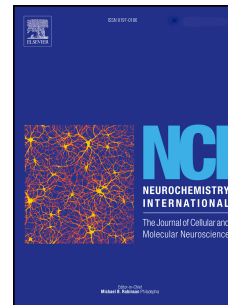

Received Date: 2 June 2016

Revised Date: 16 October 2016

Accepted Date: 17 October 2016

Please cite this article as: Mkrтчhyan, G., Graf, A., Bettendorff, L., Bunik, V., Cellular thiamine status is coupled to function of mitochondrial 2-oxoglutarate dehydrogenase, *Neurochemistry International* (2016), doi: 10.1016/j.neuint.2016.10.009.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Cellular thiamine status is coupled to function of mitochondrial 2-oxoglutarate dehydrogenase

G. Mkrtchyan¹, A. Graf^{2,3}, L. Bettendorff⁴ and V. Bunik^{1,5}
