Title: Decoding the intervertebral disc: unravelling the complexities of cell phenotypes and pathways associated with degeneration and mechanotransduction

Author: Geoffrey J. Kerr Matthew A. Veras Min Kyu M. Kim
Cheryle A. Séguin

PII: S1084-9521(16)30134-3
DOI: <http://dx.doi.org/doi:10.1016/j.semcdb.2016.05.008>
Reference: YSCDB 2033

To appear in: *Seminars in Cell & Developmental Biology*

Received date: 12-5-2016
Accepted date: 17-5-2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Decoding the intervertebral disc: unravelling the complexities of cell phenotypes and pathways associated with degeneration and mechanotransduction

Authors: Geoffrey J Kerr*, Matthew A Veras*, Min Kyu M Kim, Cheryle A Séguin

* indicates equal contributions
