

## Accepted Manuscript

Title: Time dilation in children and adults: The idea of a slower internal clock in young children tested with different click frequencies

Author: Sylvie Droit-Volet

PII: S0376-6357(17)30113-4

DOI: <http://dx.doi.org/doi:10.1016/j.beproc.2017.03.005>

Reference: BEPROC 3407

To appear in: *Behavioural Processes*

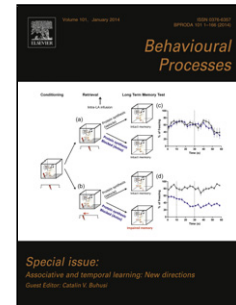

Received date: 13-7-2016

Revised date: 3-3-2017

Accepted date: 7-3-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Running head: Time dilation in children and adults

Time dilation in children and adults: The idea of a slower internal clock in young children tested with different click frequencies

#### Highlights

- . The clicks (8 Hz, 20 Hz) produce a time dilation in children as well as in adults
- . The time dilation reaches a maximum level at a click frequency lower in children than in adults
- . Differences in time dilation with the click frequency are correlated with attention capacities
