Molecular characterization of a bactericidal permeability-increasing protein/
lipopolysaccharide-binding protein from black rockfish (*Sebastes schlegelii*):
Deciphering its putative antibacterial role

Seongdo Lee, Don Anushka Sandaruwan Elvitigala, Sukkyoung Lee, Hyun Chul Kim,
Hae-Chul Park, Jehee Lee

PII: S0145-305X(16)30289-0

DOI: [10.1016/j.dci.2016.09.011](https://doi.org/10.1016/j.dci.2016.09.011)

Reference: DCI 2729

To appear in: *Developmental and Comparative Immunology*

Received Date: 25 April 2016

Revised Date: 19 September 2016

Accepted Date: 19 September 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
