This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

*Tannins for finishing lambs*

**Influence of long-term supplementation of tannins on growth performance, dietary net energy and carcass characteristics: finishing lambs**

**Short communication**

L.A. Rojas-Román<sup>1</sup>, B. I. Castro-Pérez<sup>1</sup>, A. Estrada-Angulo<sup>1</sup>, C. Angulo-Montoya<sup>1</sup>,  
J.A. Yocupicio-Rocha<sup>2</sup>, M. A. López-Soto<sup>2</sup>, A. Barreras<sup>2</sup>, R. A. Zinn<sup>3</sup>, and A. Plascencia<sup>2,\*</sup>

<sup>1</sup> *Facultad de Medicina Veterinaria y Zootecnia, Universidad Autónoma de Sinaloa. Culiacán 1084, Sinaloa, México*

<sup>2</sup> *Instituto de Investigaciones en Ciencias Veterinarias, Universidad Autónoma de Baja California, Mexicali 21100, Baja California, México*

<sup>3</sup> *Department of Animal Science, University of California, Davis 95616.*

**Highlights**

- Long-term supplementation (70 days) of tannins was evaluated in finishing lambs
- Tannin supplementation only enhance dietary net energy utilization on first 28-d
- Tannin supplementation did not enhance growth performance on whole phase of finishing
