This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Unlike in southern Africa, in northern Europe in summer cyclicity in Boer goats is interrupted.
- Estrus induction out of season in weaned Boer goats was possible; 42% gave birth to 2.1 kids.
- Estrus induction out of season in nulliparous Boer goats was possible; no pregnancies were maintained.
