Nebulizers and spacers for aerosol delivery through adult nasal cannula at low oxygen flow rate: An in-vitro study

Yasmin M. Madney, Bsc, Experiment, data entry, writing, Maha Fathy, PhD, Concept, study design, Ahmed A. Elberry, PhD, Concept, study design, Hoda Rabea, PhD, Experiment, study design, Mohamed E.A. Abdelrahim, PhD, Concept, planning of study design, statistics, and writing

PII: S1773-2247(16)30637-2

DOI: [10.1016/j.jddst.2017.04.014](https://doi.org/10.1016/j.jddst.2017.04.014)

Reference: JDDST 352

To appear in: *Journal of Drug Delivery Science and Technology*

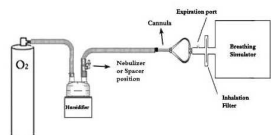

Received Date: 28 December 2016

Revised Date: 4 April 2017

Accepted Date: 6 April 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Fate of the aerosol delivered dose

Best aerosol delivery method through adult nasal cannula at low oxygen flow rate

Aerosol aerodynamic characteristics
