Title: An approach for chemical stability during melt extrusion of a drug substance with a high melting point

Authors: Abbe Haser, Siyuan Huang, Tony Listro, David White, Feng Zhang

PII: S0378-5173(17)30260-0
DOI: <http://dx.doi.org/doi:10.1016/j.ijpharm.2017.03.070>
Reference: IJP 16542

To appear in: *International Journal of Pharmaceutics*

Received date: 10-2-2017
Revised date: 16-3-2017
Accepted date: 26-3-2017

Please cite this article as: Haser, Abbe, Huang, Siyuan, Listro, Tony, White, David, Zhang, Feng, An approach for chemical stability during melt extrusion of a drug substance with a high melting point. *International Journal of Pharmaceutics* <http://dx.doi.org/10.1016/j.ijpharm.2017.03.070>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Approach to Extrude High Melting Point Drug Substance

**An Approach for Chemical Stability During
Melt Extrusion of a Drug Substance with a High Melting Point**
