Title: Identifying overarching excipient properties towards an in-depth understanding of process and product performance for continuous twin-screw wet granulation

Authors: N. Willecke, A. Szepes, M. Wunderlich, J.P. Remon, C. Vervaet, T. De Beer

PII: S0378-5173(17)30109-6
DOI: <http://dx.doi.org/doi:10.1016/j.ijpharm.2017.02.028>
Reference: IJP 16432

To appear in: *International Journal of Pharmaceutics*

Received date: 13-12-2016
Revised date: 9-2-2017
Accepted date: 10-2-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Identifying overarching excipient properties towards an in-depth understanding of process and product performance for continuous twin-screw wet granulation

List of authors:

N. Willecke^{a,b}, A. Szepes^a, M. Wunderlich^a, J.P. Remon^b, C. Vervaet^b, T. De Beer^{c,*}

^aSmall Molecules Technical Development, F. Hoffmann-La Roche Ltd., Basel, Switzerland

^bLaboratory of Pharmaceutical Technology, Faculty of Pharmaceutical Sciences, Ghent University, Belgium

^cLaboratory of Pharmaceutical Process Analytical Technology, Faculty of Pharmaceutical Sciences, Ghent University, Belgium

Corresponding author:

* Corresponding author at: Ghent University, Laboratory of Pharmaceutical Process Analytical Technology, Ottergemsesteenweg 460, 9000 Ghent, Belgium; phone: +32 9 264 80 97; fax: +32 9 264 81 96; e-mail address: Thomas.DeBeer@Ugent.be

Acknowledgements:

The authors would like to acknowledge FMC Biopolymer (Philadelphia, USA), Meggle Group (Wasserburg, Germany), Merck (Darmstadt, Germany), Grain Processing Corporation (Iowa, USA) and Shin Etsu (Tokyo, Japan) for providing free samples as well as Prof. Vincent Bulone (Royal Institute of Technology, Sweden), Prof. K. De Buysser (Ghent University, Belgium), Dr. Siegfried Krimmer and Sebastian Ley (F.Hoffmann-La Roche Ltd., Switzerland) for their contribution in excipient characterization.

List of abbreviations:

API - Active pharmaceutical ingredient

BET - Brunauer, Emmett, Teller

DVS - Dynamic vapor sorption

HPC - Hydroxypropyl cellulose

HPMC - Hydroxypropyl methylcellulose

L/S - Liquid-to-solid

LOD - Loss on drying

Log - Logarithmical

MCC - Microcrystalline cellulose

PC - Principal Component

PCA - Principal Component Analysis

pCQAs – Potential critical product attributes

QbD -Quality by Design

QTPP - Quality target product profile
