Mechanisms underlying sodium nitroprusside-induced tolerance in the mouse aorta: Role of ROS and cyclooxygenase-derived prostanoids

Mariana C. Diniz, Vania C. Olivon, Livia D. Tavares, Janaina A. Simplicio, Natália A. Gonzaga, Daniele G. de Souza, Lusiane M. Bendhack, Carlos R. Tirapelli, Daniella Bonaventura

PII: S0024-3205(17)30099-1
DOI: doi: [10.1016/j.lfs.2017.03.016](https://doi.org/10.1016/j.lfs.2017.03.016)
Reference: LFS 15163

To appear in: *Life Sciences*

Received date: 3 November 2016
Revised date: 15 March 2017
Accepted date: 20 March 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
