Identification of the key pathway of oxazolinoanthracyclines mechanism of action in cells derived from human solid tumors

Marta Denel-Bobrowska, Małgorzata Łukawska, Aneta Rogalska, Ewa Forma, Magdalena Bryś, Irena Oszczapowicz, Agnieszka Marczak

PII: S0041-008X(16)30327-1
DOI: doi: [10.1016/j.taap.2016.10.018](https://doi.org/10.1016/j.taap.2016.10.018)
Reference: YTAAP 13793

To appear in: *Toxicology and Applied Pharmacology*

Received date: 19 July 2016
Revised date: 8 October 2016
Accepted date: 19 October 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Identification of the key pathway of oxazolinoanthracyclines mechanism of action in cells derived from human solid tumors
