A quantitative framework to group nanoscale and microscale particles by hazard potency to derive occupational exposure limits: Proof of concept evaluation

Nathan M. Drew, Eileen D. Kuempel, Ying Pei, Feng Yang

PII: S0273-2300(17)30245-3

DOI: [10.1016/j.yrtph.2017.08.003](https://doi.org/10.1016/j.yrtph.2017.08.003)

Reference: YRTPH 3898

To appear in: *Regulatory Toxicology and Pharmacology*

Received Date: 29 March 2017

Revised Date: 18 July 2017

Accepted Date: 3 August 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Title:** A Quantitative Framework to Group Nanoscale and Microscale Particles by Hazard Potency to
2 Derive Occupational Exposure Limits: Proof of Concept Evaluation
