Title: Hydrogen Sulfide in Paraventricular Nucleus Attenuates Blood Pressure by Regulating Oxidative Stress and Inflammatory Cytokines in High Salt-induced Hypertension

Authors: Yan-Feng Liang, Dong-Dong Zhang, Xiao-Jing Yu, Hong-Li Gao, Kai-Li Liu, Jie Qi, Hong-Bao Li, Qiu-Yue Yi, Wen-Sheng Chen, Wei Cui, Guo-Qing Zhu, Yu-Ming Kang

PII: S0378-4274(17)30051-6
DOI: <http://dx.doi.org/doi:10.1016/j.toxlet.2017.02.004>
Reference: TOXLET 9692

To appear in: *Toxicology Letters*

Received date: 1-11-2016
Revised date: 22-1-2017
Accepted date: 5-2-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Hydrogen Sulfide in Paraventricular Nucleus Attenuates Blood Pressure by Regulating Oxidative Stress and Inflammatory Cytokines in High Salt-induced Hypertension

Running Title: H₂S in PVN attenuates blood pressure in hypertension
