

List of The Journal of Strategic Information Systems Reviewers 2013–2014

The editors and publishers of JSIS would like to publicly acknowledge and thank all of our colleagues from around the world who graciously gave of their limited time to provide reviews for the many submissions to JSIS received during the past year. Without their help and guidance the task of publishing a premier journal would simply be impossible. JSIS is rightly proud of its standing in the international Information Systems academy, which is illustrated by the crucial support received from the following reviewers who we have listed alphabetically below. The fact that there are 220 or so reviewers listed from 26 different countries speaks volumes for the widespread reach of and global interest in JSIS. Each and every one of the reviewers has gone out of his or her way to assist the editors and authors of the papers submitted to the journal throughout the year. While JSIS publishes 20 or so papers annually, over ten times that number cannot be published by us. Nonetheless, the care taken by the reviewers in providing advice to authors – unsuccessful and successful alike – in developing their papers further, in the former case for submission elsewhere, is exemplary and we wanted to publicly thank each and every one of them for their efforts on behalf of JSIS and the wider IS community.

JSIS Reviewers 2013–2014
