Title: NAD(P)H-dependent Quinone Oxidoreductase 1 (NQO1) and Cytochrome P450 Oxidoreductase (CYP450OR) differentially regulate menadione-mediated alterations in redox status, survival and metabolism in pancreatic β -cells

Author: Joshua P. Gray Shpetim Karandrea Delaine Zayasbazan Burgos Anil A Jaiswal Emma A. Heart

PII: S0378-4274(16)33123-X
DOI: <http://dx.doi.org/doi:10.1016/j.toxlet.2016.08.021>
Reference: TOXLET 9590

To appear in: *Toxicology Letters*

Received date: 12-5-2016
Revised date: 27-7-2016
Accepted date: 20-8-2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

NAD(P)H-dependent Quinone Oxidoreductase 1 (NQO1) and Cytochrome P450 Oxidoreductase (CYP450OR) differentially regulate menadione-mediated alterations in redox status, survival and metabolism in pancreatic β -cells
