### Conflict of interest

There are no conflicts of interest.

### Sources of Funding

Role of funding source: The study was supported by Trauma Research, Kadoorie Critical Care Research and Education Centre and the Department of Health.

### Ethical Statement 12 Feb 2016

This study is conducted to a high ethical standard and adheres to local regulations and standards for gaining scrutiny and approval. It has been reviewed and given a favourable ethical opinion by the National Research Ethics Service Committee London – Riverside and Camberwell and St Giles in August 2015 (Ref:15/LO/1205).

### ABSTRACT

**Background:** This paper presents a qualitative study protocol focusing on older peoples' experience of recovery in acute care following hip fracture and also the experiences of their family or informal carers. There is limited evidence regarding older people and their relatives/carers experience of recovery in acute care.
