This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Parenteral nutrition dysregulates bile salt homeostasis in a rat model of**
2 **parenteral nutrition-associated liver disease**

12

13 **Running head:** Bile salt homeostasis in a rat PNALD model

14 **Number of figures and tables:** 4 figures, no tables

15

16 **List of abbreviations:** PNALD, parenteral nutrition-associated liver disease; FXR, farnesoid X
17 receptor; SHP, small heterodimer partner; FGF, fibroblast growth factor; ALT, alanine
18 aminotransferase; AST, aspartate aminotransferase; AP, alkaline phosphatase; GGT, gamma
19 glutamyl transferase; TBS, total bile salts; TG, triglyceride

20

21 **Disclosures:** This study was supported by a grant from Baxter (no. GHOL6273). Baxter was not
22 involved in design of the study, collection or analysis of data, or preparation of the manuscript.
