This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Podiatric characteristics of patients with fibromyalgia.

Authors: José Manuel Padín Galea; María Jesús Fernández-Aceñero; and José Luis Moreno de la Fuente.

From the Department of Podiatric Medicine, University Alfonso X el Sabio, Villanueva de la Cañada, Madrid.

Address for correspondence: M^a Jesús Fernández-Aceñero C/Hilarión Eslava 28 6-A 28015 Madrid.

e-mail to: mgg10167@gmail.com

Highlights:

- Few previous reports addressing pathology in fibromyalgia
- Results show discordance between pain perception and functional sequelae in these patients
