This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Prognostic Importance of Low Admission Serum Creatinine Concentration for Mortality  
in Hospitalized Patients

Charat Thongprayoon, MD\*

Wisit Cheungpasitporn, MD\*

Wonngarm Kittanamongkolchai, MD

Andrew M. Harrison, Ph.D

Kianoush Kashani, MD

**Author Affiliations:** Division of Nephrology and Hypertension (Drs Thongprayoon, Cheungpasitporn, Kittanamongkolchai, and Kashani) and Division of Pulmonary and Critical Care Medicine (Dr Kashani), Mayo Clinic, Rochester, Minnesota. Mr Harrison is a student, Mayo Medical School, Mayo Clinic College of Medicine, Rochester, Minnesota.

\*Drs. Thongprayoon and Cheungpasitporn equally contributed to this study.

**Reprints:** Kianoush Kashani, MD, Division of Nephrology and Hypertension, Mayo Clinic, 200 First St SW, Rochester, MN 55905 (kashani.kianoush@mayo.edu) Phone: 507-266-7960.

Conflicts of interest: None.

Financial support: None.

Funding source: None.

Text word count: 2,160

Abstract word count: 243

No. of tables: 4

No. of figures: 2

Running title: Low Serum Creatinine at Admission and Mortality

All authors had access to the data and a role in writing manuscript.
