**Running Head:** Diagnostic Colonoscopy after FIT in Safety-Net System

**Key Words:** Colorectal cancer screening; safety-net health system; fecal immunochemical test; colonoscopy; randomized controlled trial

**Financial Support:** This study was conducted as part of the NCI-funded consortium Population-Based Research Optimizing Screening through Personalized Regiments (PROSPR) with support from NIH/NCI Grant U54CA163308-01. Dr. Halm was supported in part by the AHRQ Center for Patient-Centered Outcomes Research (R24 HS022418). The content is solely the responsibility of the authors and does not necessarily represent the official views of the National Institutes of Health or AHRQ.
