This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Disclosures: Supported by grants from the National Institutes for Health (R21 DA020108) and the Minnesota Medical Foundation to LJK and LSS, the Canadian Institutes of Health Research/Canadian Pain Society/Astrazeneca Biology of Pain Young Investigators Operating Grant XCP-83755 and CIHR Operating Grant MOP-126046 to LSS, the Canadian Foundation for Innovation and the Quebec Network for Oral and Bone Health Research for Infrastructure support to LSS and TKL and the Fonds de la recherche en sante Quebec Salary Award (Bourse de chercheur-boursier "Junior 2") to LSS. The sponsors had no role in the study design, collection, analysis and interpretation of data; in the writing of the report; and in the decision to submit the article for publication. The authors declare no competing financial interests.

Abbreviated title: Proteomic analysis of cerebrospinal fluid in patients with painful disc degeneration

Acknowledgements: The authors would like to thank Ms. Line Roy, Dr. Lucy Vulchanova, Dr. Carolyn Fairbanks, Dr. Patrick Braun and Dr. Akanksha Srivastava for intellectual and technical support throughout the course of this project.
