This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Comparison between pressure regulated volume-controlled (PRVC) and volume-controlled (VC) ventilation on oxygenation parameters, airway pressures and immune-modulation during thoracic surgery.**

**Institution:** Faculty of Medicine, Minoufiya University, Egypt

**Funding:** Minoufiya University is funding the research

**Keywords:** pressure regulated volume-controlled mode; volume-controlled mode; thoracic surgery

**Short title:** PRVC vs VC ventilation during thoracic surgery

**The study was registered with the Pan African Clinical Trials Registry (PACTR201512001388104).**

**No external funding and no competing interests declared.**

**Acknowledgements:**

Great thanks to operating room and ICU staff in Minoufiya University Hospital for their help in conducting the study protocol.
